

Lab Exercise #3: Forms

Create a Job Application form that takes the user personal information, previous education and all the programming languages he masters.

The form should have

- Three fieldset elements with their legends.
- Text Boxes, use the appropriate attribute to require users to complete the **Full Name field** for the form to submit.
- Email Box, use the appropriate attribute to give users a hint for filling out the field.
- Radio Buttons
- Checkbox
- Text Area
- Select Box
- Upload Files
- Submit Button

Job Application

PERSONAL INFORMATION

Full Name:

Email:

yourname@example.com

Gender:

☐ Male

☐ Female

PREVIOUS EDUCATION

College/University:

Major:

Computer Science
