Lab#4 (CSS)

1- Create an HTML file that has two headings, two paragraphs and an image.
2- Create an external style sheet and load it into the HTML page. **(Create a different folder for CSS files)**
3- In the external sheet create a declaration that changes the color of paragraphs to any color of your choice and changes the border style of the image to dashed border.
4- Create an embedded style sheet and change paragraphs' font size and change headings' color.
5- Create an inline rule that puts a colored border on the image with a 7px width.
